Overall Style:

Font:
Use 'Roboto,' a sans-serif font, for a clean and modern look.

Color Scheme:
Primary colors are #ed2ff0 (magenta) and #22a8cd (blue), with a background of #221f2f (dark purple) and text in white (#fff). Use gradients and blurs for background effects.

Scrollbar:
Custom Scrollbar: A 10px wide scrollbar with a #888 (grey) thumb, turning #555 (darker grey) on hover.

Layout and Structure:
Body: Full viewport height with a dark background. Decorative blurred circles in magenta and blue are positioned at different screen parts.

Main Content Area: A flexbox layout with space between alignment and a margin at the top.

Sections: Full viewport height with a semi-transparent black overlay for content contrast.

Header: Fixed position with a z-index higher than other elements for visibility. Includes a logo and navigation menu in the header.

Typography:
Headings: Large, bold, and impactful, especially in sections.

Navigation Links: White text that turns black on hover, spaced evenly, and visible against the semi-transparent background.

Interactive Elements:
Buttons and Inputs: Styled with transitions for hover effects, mainly using the color #675afe (blue) for focus and hover states.

Convert Box: A part of the currency converter, styled to align items and justify content.
Cards and Containers: Styled with a semi-transparent background, rounded corners, and a subtle shadow for a sleek, modern look.

Responsiveness:
Media Queries: Adjust the layout for smaller screens, reducing the size of elements and

fonts for better mobile compatibility.

<u>Special Features:</u>
Sticky Header: Changes on scroll, becoming more compact with a different layout for navigation and logo.

About Us: Presented in a slider format with circular images, white text, and navigation arrows.

<u>Footer:</u>
A dark footer with content spaced evenly, maintaining the overall aesthetic of the site.
Additional Styling

Forms: It is styled with a semi-transparent background and rounded borders.

Error Messages: Displayed in red for better visibility.

Maps and Charts: Integrated with the design, maintaining the color scheme and style consistency.

<u>Accessibility Considerations:</u>
Contrast: Ensure that text and background contrast meet accessibility standards.

Keyboard Navigation: Ensure all interactive elements are accessible via the keyboard.
